CONVOCATION: IV WORKSHOP GWP SURVEY 2012
Barcelona, Catalonia-Spain

Organizes: OAG / Observatori Fabra

- **Date: Sunday, 2nd December 2012.**
- **Timetable: From 10h to 14h**

Registration (free): send an e-mail with names/telephone number/origin
informaciooag@gmail.com.

Contact Observatori Fabra: puntovernal@telefonica.net

Deadline: 20th November 2012

Distant connections: participants may choose to establish connection through SKYPE.

It has to be specified in the registration

Observatori Fabra: <http://www.fabra.cat/observatori> Camí de l'Observatori s/n.
08035 Barcelona.

Dear colleagues,

We have finished the first part of the GWP Survey with 1725 new systems which have been catalogued and included to the WDS. You can consult the actualized details in <http://www.oagarraf.net>.

For all these reasons, we call you to a new **Workshop (IV)** to summarize the actual state of the project, inform of the proposed calendar for 2013 and also to present the new version of the searching program (v3) recently developed in collaboration with Virtual Observatory's (SVO) team coordinated by Enrique Solano. With this new tool, the time spent on the selection of possible systems is noticeably reduced.

The professional team, coordinated by D. Valls (CNRS-Observatoire de Paris), E. Solano and José A. Caballero (CAB/INTA-CSIC) are already working in an advanced stage of the astrophysics analysis and preparing the firsts articles on the corresponding publications. The edition of the catalog (Part I), and the detailed study of the tens/hundreds of systems are now the main target.

Late September the stage of the GWP Survey was presented at the congress Pro-Am celebrated in Rodez (France) and the international community found it very interesting. This leads us to set the ending times of Part II by the end of 2013.

Best regards, The coordination.
