The GTC Archive

GTC Archive

The Gran Telescopio CANARIAS Archive

This data server provides access to the GTC Archive. The **Gran Telescopio CANARIAS (GTC)**, is a 10.4m telescope with a segmented primary mirror. It is located in one of the top astronomical sites in the Northern Hemisphere: the Observatorio del Roque de los Muchachos (ORM, La Palma, Canary Islands). The GTC is a Spanish initiative led by the Instituto de Astrofísica de Canarias (IAC). The project also includes the participation of Mexico (Instituto de Astronomía de la Universidad Nacional Autónoma de México (IA-UNAM) and Instituto Nacional de Astrofísica, Óptica y Electrónica (INAOE)) and the US (University of Florida (UFL)). The project is actively supported by the Spanish Government and the Local Government from the Canary Islands through the European Funds for Regional Development (FEDER) provided by the European Union.

New data: Reduced data

Benefits

- Facilitates the scientific exploitation of GTC data.
 - Enhances the value of the archive.
 - Provides a higher visibility of scientific results.
-
- ✓ **ADS: refereed papers (keyword in the abstract):**
 - SDSS : 3470
 - 2MASS: 1569
 - WISE: 223
 - UKIDSS: 179
 - OSIRIS: No batch mode for bulk processing
 - CANARICAM: Not foreseen
 - Future instrum. (EMIR, MEGARA, FRIDA,...): Foreseen

Welcome to ADSLabs Fulltext Service!

This interface allows users to search the collection of electronic fulltext papers indexed in the [ADS](#). It provides an exhaustive search solution useful for locating mentions of specific terms in the body of papers indexed in our fulltext archive, rather than just [their abstracts](#). While not all of ADS's bibliographic records are currently covered by this service, it does cover the major astronomy journals, as well as physics journals published by Springer, Elsevier, the American Physical Society, and the American Geophysical Union, as well as all of the [arXiv eprints](#). For more information view the [help page](#).

Encuesta GTC Junio 2013

The aim of this survey is to determine the degree of satisfaction of the users of the GTC Scientific Archive (<http://gtc.sdc.cab.inta-csic.es/gtc/>). It is not mandatory to answer all questions.

* How did you know about the GTC Archive?

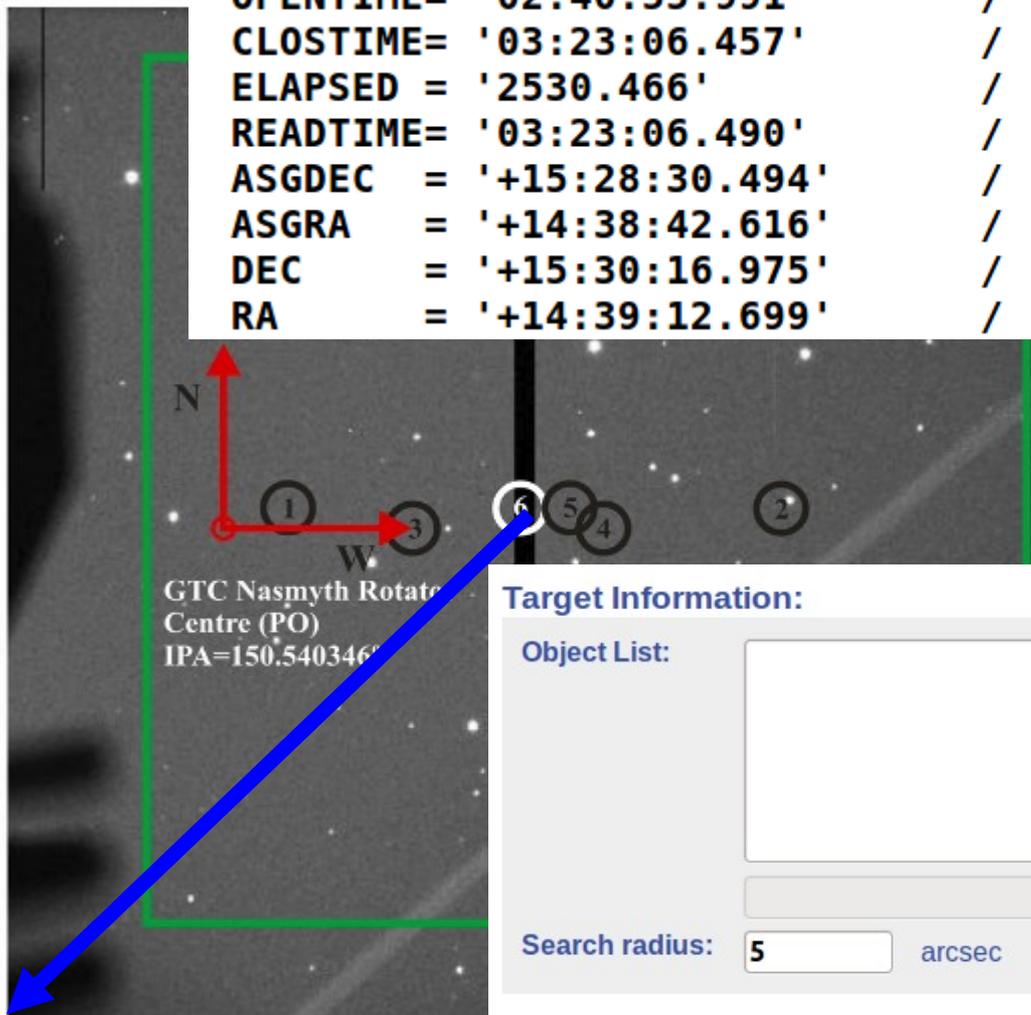

- Search engines (Google,...)
- Presentation in workshops / conferences
- GTC web page
- Others (please, indicate)

* What were the reasons for using the GTC archive?

- Look for my PI data
- Planning of future observations
- Research based on archive data
- Calibration of science data
- Education & Outreach

An issue: The search radius

And a couple of suggestions

Data dissemination

Once the observations have been obtained and are considered to be of the correct quality, the PI will be informed about how to obtain the scientific data files from the FTP server. The data will remain available on the FTP server for a period of at least 50 days. The PI enjoys a one-year proprietary period for her/his data, after which the data will be made publicly available.

*... through the GTC Archive (<http://gtc.sdc.cab.inta-csic.es/gtc>).
Observers are also encouraged to contact archive staff to submit their reduced data once they have been published.*

+ in the Call for proposals
